Amerideck Introduces Innovative ChoreMaster, Multi-Purpose Dump Box Attachment for Pick-up Trucks

Amerideck, Inc. is pleased to announce the introduction of its newest product to enhance any trucks versatility. The ChoreMaster multi-purpose / dumper serves as three distinct products all rolled up into one affordable package. Like the other products from AmeriDeck, the ChoreMaster is a cargo loading system that will load up to 2000 lbs. from ground level into the truck in seconds with only the touch of a button. Additionally, the ChoreMaster is an insert dump unit offering over 40 cubic feet of capacity for up to a full ton of loose material. Because the ChoreMaster cargo box is easily detachable from the lifting arm, the unit is ideally suited for use as drop and leave refuse container or for ground level material loading and unloading. The ChoreMaster is easily installed in any full size pick-up truck in less than 2 hours with no modifications required to the vehicle. The ChoreMaster features a quick detach system that allows for interchanging of platforms. Additional features include: secure under deck storage, 14 steel construction, 4 tie down D-Rings, 6 stake pockets, easy off tailgate design and no interference with trailer hitches.

RAM Mounting Laptop Accessories

Mobile computing is becoming a necessity. While today's laptops are more powerful than ever, without a functional mounting system that is vehicle appropriate, they become less useful, even dangerous in a mobile environment. National Products Inc., the makers of RAM Mounting Systems, offers a solution for nearly every vehicle on the road today. RAM mounts are offered in durable plastic and aluminum so choices abound. From light duty pedestal

mounts for the Insurance Appraiser to mounts for Big Rigs. Once the right pedestal is chosen, the only other thing needed is the fully adjustable, spring loaded RAM Tough Tray. Regardless of who made the laptop, this tray will hold it

firmly and in all the right places. The installer decides the position of the side arms providing perfect hold and support for their unit. No port or function key is ever inaccessible. If you need a screen support or keyboard light, RAM has those as well.

Smooth Going and Greater Capacity with MATTRACKS® Model 150 Series Suspension Track Systems

The MATTRACKS Model 150 M1-A1 has an offset oscillating suspension to smooth over rough terrain. The Model 150 M1-A1-SA also has an offset oscillating suspension plus the TRACKSTEER steering assist package for easy, one-handed steering while standing in place. The offset oscillating suspension allows the tracks to follow the contour of the terrain, smoothing over the moguls for a controlled, stable ride.

MATTRACKS feature 16-inch wide rubber tracks that provide extended wear characteristics while retaining a smooth ride. Fits most 4x4s up to 1 1/2 tons and can travel up to 40 mph on hard surface. MATTRACKS can conveniently bolt up to most trucks and SUV's in as little as 30 minutes.
