Company Description

RAM is one of the most comprehensive mounting solution providers in the world. Manufacturing products from Steel, Aluminum, and Plastics, components and kits are available to support most any electronic device. With cutting edge design, high tech manufacturing, and rapid distribution, RAM is a global source for innovative electronics accessories.

Markets Served

With mounts suited to most any environment, RAM has found a place in numerous markets. Mounts are available for Police, Fire, Rescue, Aviation, Off Road, Marine, and Military as well as consumer use. Solutions are available for small cameras to large targeting computers for the US Military and everything in-between.

Customer/Technical Support

RAM Mounting Systems provides technical support by phone and online via email. This allows a more efficient

exchange of ideas, both verbally accompanied by technical drawings or photos.

Major/New Products or Features

RAM recently unveiled its New Laptop Mounts for vehicles; far away the most durable and versatile products of their kind in the industry. Thoughtfully designed and ruggedly built, systems are available for numerous popular foreign and domestic vehicles.

Other Info of Interest

RAM's product line is comprehensive and interchangeable. The ability to create exactly the right solution for your application cannot be overestimated. Another key feature is the rubber ball and socket design incorporated in many solutions. This design helps to isolate damaging shock and vibration extending the life of the mounted device. No other maker of mounting products has dedicated itself to providing such an extensive line of accessories.
