RAM Powered Docking Stations for Panasonic Toughbooks

The long anticipated RAM Powered Docking Stations for Panasonic Toughbooks are projected to start shipping in the first quarter of 2006. The new docking stations are lightweight and include port replication to provide all the whistles, buttons, and bells. They also include a locking feature to prevent theft. For more information, please visit www.ram-mount.com.

Kustom Signals' New Directional Talon

Kustom Signal's new Directional Talon radar can be used in a patrol car or on a motorcycle, corded or cordless, or as a handheld or dash-mount. It can be operated with the handle on in the moving mode or with the handle off, using the optional POD. The new antenna design has eliminated many of the operational anomalies of moving radar such as elimination of EMI and RFI concerns and greatly reduced patrol speed combining and shadowing. For more information, please visit www.kustomsignals.com.

StowAway2 Cargo Carrier for K-9 Vehicles

The StowAway Carrier is an inexpensive alternative to a larger K-9 vehicle. With the StowAway you can store equipment outside the vehicle and away from the canines. You get ground-level access to vital gear. The steel latch and optional hitch lock will secure your equipment from theft. And the Swingaway model pivots away from the vehicle so you can open the rear door and quickly get to your dogs. Store leashes, ballistic vests, first aid gear, training aids, and more. Securely store gear away from the kennels and keep your dogs safe. Visit www.stowaway2.com or call (800) 943-5377 for more information.

American Armature's Nitro II

American Armature introduces the Nitro II Series Alternator for the 2000-2005 Chevrolet Impala Police Package. Depending on engine rpm it is capable of producing up to 170 amps at idle and well over 220 amps at higher engine RPMs! The alternator is manufactured new with heavy-duty components. Designed as a direct bolt-on replacement -additional wiring harnesses and mounting brackets are not required. You can improve your Fleet's performance and reduce downtime by installing the Nitro II today. For more information, please visit www.americanarmature.com.

RAM Mounts www.ram-mount.com

The No Drill laptop mounts by RAM displayed at IACP 2005 are impressive to say the least. However, add the accessory printer mount and the overall kit is an officer's best choice. Complete systems are available for all popular domestic police, fire, and rescue vehicles. Numerous foreign makes and models are also provided for, making this product line the most comprehensive of its kind. Utilizing existing vehicle hardware for mounting, these kits are simple to install and of exceptional quality.

RAM Mounts

RAM's No Drill laptop mounts, with an integrated printer mount, offer the ultimate in versatility while taking up a minimal amount of space. Turning a vehicle into a comfortable, productive, and efficient work space can be easily achieved with RAM.

Features include a telescoping pedestal for height adjustment, double swing arms for easy reach, rubber ball and socket for perfect viewing angles, and vibration dampening, and the RAM Tough Tray that holds practically every laptop available. And while the accessory printer mount is a popular addition, a GPS, cell phone, or PDA can be easily mated to the laptop tray as well.

RediAlert www.REDIALERT.com

RediAlert is the first truly trans-

portable LED Emergency Message Sign. Officers can store the signs in their vehicles' trunks and deploy them in less than five minutes. On site, the officer simply unloads, sets up and types in the emergency message. The patented LED technology uses a 12-volt battery so no generator is needed. RediAlert's sturdy design makes it weather resistant and it meets DOT specifications.

RediAlert

Messages can be changed as situations dictate; choose from an array of preprogrammed messages or create event-specific messages. Three mounting options are available: wheel-based, trailer hitch, or stand alone, with telescoping legs and stabilizer that adjust for uneven surfaces.

In addition, the two interlocking face panels can be stacked for up to three lines of text, or changed for multi-directional messaging. RediAlert is ideal for many markets and applications, including: Emergency Routing, Disaster Response, Amber Alert, Traffic Incident Information, First Responders, HAZMAT Materials, Crowd Control.

Santa Cruz Gunlocks www.SantaCruzGunlocks.com

Santa Cruz Gunlocks' Model SC-5 universal gunlock will safely hold any long gun in a patrol car, in the armory, or in the home. Conventional gunlocks do not work well with today's advanced rifles with a number of aux-

iliary devices on the forestock. The lock is made from stainless steel, and soft rubber protects weapon surfaces.

A special feature of the lock is that it can be shifted along a steel bar to grab a weapon anywhere from behind the trigger to the tip of the barrel. Switch one rifle/shotgun out, move the lock, and put in a different weapon. The lock comes with an electric push-button and a variety of manual key overrides.

Setina www.setina.com

Setina Manufacturing's New Single Prisoner Transport System (SPT) comes with all the standard features of a Setina product, even though the partition is only designed to contain a single occupant. The front part of the partition still maintains the Setina standard, full-vehicle width, heavy-duty roll-bar style framework with protective padding.

The new partition also features heavy-duty steel panels and your choice of either a standard-coated expanded metal window or optional coated scratch-resistant polycarbonate. The center divider is made of coated scratch-resistant polycarbonate and is molded to the shape of the backseat area. On passenger cars, the area behind the driver's seat is an open space for equipment storage or the full
