RAM-VC-LEG-106

# RAM Console Leg Kits

National Products, Inc.

## Console Leg Kit for the FORD F-150 (2004-2010)

### SPECIFICATIONS

**Drilling Requirements:**  
No drilling required

**Finish:**  
Black Powder Coating

**Placement:**  
Over transmission hump

### INSTALLATION INSTRUCTIONS

The purpose of this instruction sheet is to illustrate the manufacturer's recommended method of installation for the RAM-VC-LEG-106 Leg Kit that includes anchor legs and a bagged hardware kit.

1. Start by removing the center section of the 40/20/40 bench seat. You will find four large bolts at the base of the center section of the bench seat. Using a T-45 torx bit, remove these bolts.
2. Next, using the supplied hardware, attach the top plate support legs as shown in the illustration below.
3. Attach the support leg to the top plate. See the illustration below. Orient the top plate so that the attached support leg is towards the dash of the vehicle and fasten the assembly to the two anchor legs. Note that the support leg can be fastened to the transmission hump using self tapping screws but it is not necessary to do so. Once the top plate is installed, mount your RAM Tough Box and accessory products to the top plate.

#### Disclaimer regarding mounting of product:

National Products Inc. and/or RAM Mounting Systems is not liable under any theory of contract or tort law for any loss, damage, personal injury, incidental or consequential damages for personal injury or other damage of any nature arising directly or indirectly as a result of the improper installation or use of its products in vehicles or any other application. In order to safely install and use RAM Mounting System or National Products Inc. products full consideration of vehicle occupants, vehicle systems (i.e. the location of fuel lines, brakes lines, electrical, drive train or other systems), air-bags and other safety equipment is required. RAM Mounting Systems and National Products Inc. specifically disclaims any responsibility for the improper use or installation of its products not consistent with the original vehicle manufacturers specifications and recommendations.

## Area must be open or be made open to fit leg kits

### SPECIFICATIONS

**Drilling Requirements:**

For some vehicles, drilling may be required. See vehicle specific kits for No-Drill™ applications and universal for all others.

**Finish:**

Black Powder Coating

### INSTALLATION REQUIREMENTS

The area between the front seats must be accessible in order to mount the leg kits and top plates to support a console.

The area must be open between bucket seats or, if the vehicle has a 40/20/40 front bench seat or similar configuration, the center section must be removed.

If the vehicle has a floor mounted shifter, either automatic, manual, or 4x4 lever, make sure there is ample room to the rear of the shifter and the floor board is clear before making a RAM-VC-LEG kit selection. The installed RAM-VC-LEG kit should be installed in a manner that does not interfere with the operation of shifters or levers.

For some vehicles, there may be room between the center of the bench seat front and the dash of the vehicle. If removing the center section of the bench seat is not an option, but there is room at this location, consider the universal leg kit, short top plate, and short console box as a possible solution.

**If the vehicle is equipped with a factory installed center console, make sure it can be removed without :**

1. Permanently disabling the vehicle.
2. Exposing sensitive electrical equipment to harm.
3. Exposing mechanical systems to harm.
4. Interfering with factory installed safety equipment.

Some factory installed equipment and consoles cannot be removed. If this is the case for your vehicle, consider other RAM products designed for mounting electronics safely and securely in your vehicle.
