ture, providing operating insight into the condition of transformers. Transfix is designed for use in substation environments, does not require the use of consumables and can be ordered with a variety of alarm and communications options. Transfix units require only minimal maintenance and are easily installed. *Contact: Kelman, Chicago, Ill., (773) 944-0933; fax (773) 944-0690; mail@kelman-usa.com; www.kelman-usa.com.*

## VEHICLE MOUNTS

Heavy-duty steel RAM Vehicle Mounts from National Products are custom-formed to fit specific fleet vehicles from Ford, General Motors and Chrysler. Bases attach using existing front bench or passenger side rail bolts to provide a mounting platform for any RAM mounting system. Existing vehicle hardware is used to attach the RAM mounts. No additional drilling is necessary. *Contact: National Products, Inc., Seattle, Wash., (206) 763-8361; fax (206) 763-9615; staff@rammount.com; www.rammount.com.*

## I/O INTERFACE

SNAP DNP I/O from POWER Engineers is an ethernet-based I/O system with a wide selection of analog and digital input and output modules. Using standard DNP protocol, SNAP DNP I/O functions as a simple DNP slave to remotely control, monitor and acquire data from substation equipment. Information is sent to a SCADA master over the DNP network. SNAP DNP I/O is modular and expandable, with users buying only functions they need. *Contact: Power Engineers, Inc., Halley, Idaho, (208) 788-3456; fax (208) 788-2082; tony.thomas@powereng.com; www.powereng.com.*

VT Pack and wiring harness for voltage transformer applications. The VT Pack does the same work as three separate voltage transformers while conserving space in transformer cabinets and reducing inventory and installation costs. The VT Pack can be mounted in a pad-mount transformer, transformer cabinet or other convenient location. The wiring harness can be custom

## METER PACK

Brooks Utility Products Group offers the Two Sockets-Two Meter

# REPAIR CONDUIT IN A Snap!

Designed especially for power, communications, and fiber optics.

STEP 1: Remove Damaged Conduit

STEP 2: Cut Split Duct Conduit to Fit

STEP 3: Snap In Place

STEP 4: Attach Adapters

STEP 5: Finish Job in Record Time!

No Tape, No Plastic Straps, No Metallic Straps,  
**No KIDDING!**
