## ORION RF System

Catch a rising star in non-licensed radio frequency technology designed for water and gas utilities. With the advanced ORION technology, utility customers can easily upgrade their meter reading system. ORION is designed for maximum flexibility to meet the various system and application needs for all water municipalities.

No FCC licensing is required! Customers will get faster meter reading, greater accuracy and can eliminate the need for estimated bills. Plus, with optional features like leak detection, GPS mapping programs and connectivity to power line carrier technology, broadband over power line and Wi-Fi networks, customers can tailor ORION to fit their system's needs. AMR technology has never been more accessible.

## RAM Offers New Innovative Option for Powering Laptops and Tablets

The new RAM Power Adaptor is a compact, easily integrated and simple solution to your power needs. Ideally suited for a wide variety of applications, six different voltage outputs can be achieved to make sure your device is getting exactly the right amount of juice. With a power input range of 12 to 35 volts DC, you're sure to find multiple uses for yet another great RAM accessory. Easy to read LED indicators, ON/OFF switch, replaceable fuse, and thread on input and output are just some of the design features that are sure to impress.
